<b>Submission of Environmental Statement</b>	<b>Period</b>	Proposed Unit
<b>Other Relevant Information</b>		<ul style="list-style-type: none"> <li>○ Pedhi river (Notified A-II Class) approx 8 Km away from the project.</li> <li>● SRO reported that the land marked by MIDC for the HRTS is about 75 Ha as per the proposal initially 10 Ha will be developed for SSHEHS. For the disposal of the 36% of treated effluent i.e 1.8 MLD it seems to be adequate. However for the total quantum of treated effluent disposal it seems to be inadequate.</li> </ul>
<b>Recommendation of SRO/RO</b>		<p>SRO opined that if CETP adopt HRTS system for the disposal of treated effluent after few years water logging capacity of soil will totally disturb and it may create chances to surface runoff to adjacent nalla which ultimately meets to Pedhi River (Notified A-II Class), therefore the treated effluent shall be given to the respective industries only and after MEE crystallizer HW can be sent to CHWTSDF Butibori. Recommended subject to Zero Discharge of effluent.</p>
<b>Recommendation of HQ (including consent fees details / delay payment charges )</b>		<p>We may grant C to E with E.C condition.</p> <ul style="list-style-type: none"> <li>- Initially they are developing 10 Ha of SSHEHS (Soil sand High Efficiency Hybrid System).</li> <li>- 36% of 5.0 MLD i.e 1.8 MLD will be treated in treatment facility (Prim, Sec &amp; Tertiary and send for SSHEHS.</li> <li>- And about 60 % (2.7 MLD) will be treated upto RO System and recycled.</li> <li>- Dye Bath effluent (0.5 MLD) treated by RO and recycle. Reject will be treated in MEE.</li> </ul>
