## Maharashtra Pollution Control Board

			started. Till completion of crushing season 2013-14 it was working efficiently with proper results as per the norms.
	2.	You have not provided 15 days storage tank for treated effluent,	We already have started the work of 15 days storage tank of treated effluent. The excavation work is in hand. The storage tank will be ready in all respect before starting of crushing season 2014-15.
	3	Air pollution control system is not provided as per the CREP Norms,	The issue of providing wet scrubber / bag filters to all the boilers as per CREP norms is put up to Hon. Management for Approval. It is expected that the issue will be solved before starting of crushing season 2014-15.
	4	Effluent generation is not achieving 100 ltrs of per ton cane crushing	Planning to provide various arrangement in the plant to reduce waste water generation. We have already installed various instruments like cooling tower single entry condenser, hot condensate for mill imbibition, continuous sulphur burner cooling water is recirculated in the service tank to minimize water consumption. Maintaining house keeping properly we are trying to achieve effluent generation 100 Ltrs per ton of cane.
	5	using kaccha laggons to store the untreated effluent	The existing kuccha lagoons will be scrapped during this season 2014-15 forever. Now our crushing season is over and distillery also is stopped so generation of waste water, spent wash is automatically stopped.
	6	You have not submitted the Bank Guarantees as per the previous consent condition	Bank Guarantee as per the previous consent conditions will be made shortly.
<b>Recommendation of SRO/RO</b>		SRO has recommended that the decision of the consent may be taken at higher level.
