- **Opinion of Legal Wing** – In number of Cases more particularly in construction projects after handing over the possessions to the occupants, the buildings are being handed over to different societies in the same project for effective management of the maintenance of the buildings and there it is not expected to have separate clearance to such projects. The environment clearance granted to whole project is being utilized for the operation & maintenance of the waste management in number of buildings and societies formed in that project. The condition about no change in layout, waste load and structure shall be imposed in the consent being considered by competent authority.

**Recommended that the case may be discussed in CC Meeting for further decision.**
