Name of Industry: M/s Rama Krishi Rasayan.

G.No. 43, Loni-Kalbhor, Tal-Haveli, Dist- Pune.

- Application recd at RO/SRO Raigad on 01.03.2012
- Application recd at HQ on 13/03/2012
- Existing Unit, Mfg of Basic Fertilizers products.
- Existing Rs 35.59 Cr + Proposed Rs 6.0 lakhs, Total : 35.65 Cr
- Now applied for amendment with increased quantity by capacity utilization. There is no increase in pollution load.
- Industry has submitted no increase in pollution certificate and pollution load proforma.
- Earlier the case was discussed in CC meeting held on 4/9/2012. The case was deferred and it was re-examine the case wrt increase in pollution load corresponding to the increase in quantity of raw material, according to EC clarification issued by MoEF vide dtd 14.12.2006 as well as para no 6 of RRZ policy 2009.
- Industry has submitted details of raw material consumption and pollution load comparative statement. From this, it is noticed that, after increased production raw material consumption will be reduced as compared to earlier production also industry has submitted product-wise pollution load.
- Earlier the case was discussed in CC meeting held on 18/01/2013, and it was decided to keep the case in abeyance for examination by HOD. Now the query reply recd from SRO Pimpri Chinchwad, from this, it is noticed that, there is no increase in pollution load.
- RO Pune has recommended for amendment in consent by overriding effect on the existing consent by imposing BG condition towards O & M of APC's.

As the changes in quantities of products are in the same category and pollution load are within the previously granted overall total limits for the proposed de bottle necking, we may consider the case without prior EC. Similarly the clarification to Para No -6 of RRZ policy is justified and found in accordance as per the policy as the overall raw materials including water and fuel found not increased and are within the overall inside the limits. In view of above and as per pollution load computation, no additional pollution load Viz air emission, waste water and HW will be generated due to the capacity utilization as being proposed without change in existing infrastructure as well as utilities and such proposed changes are going to remain the previously (Existing valid consent) granted overall limits.

We may consider the case for amendment with increased quantity by capacity utilization in the existing unit with overriding effect on existing consent upto 31.12.2013 by imposing following conditions

- a. Operational BG of Rs 5 lacs.
- b. Use of raw material restrict to 22309 MT/M against 22819 MT/M
- c. Use of import coal having sulphur content 0.4-0.5 % in place of Indian coal (1 %)
