Compliance of Air Pollution Related Conditions	YES ()	NO ()
	Details :-	
Water Cess	Assessment Done:	Paid upto:
BG Details	Amount:	Validity;
	BG obtained against:	
	Details of BG forfeited/ encashed, if any:	
Submission of Environmental Statement	Period	
Other Relevant Information	Existing unit manufacturing Automotive Lube oil. Now applied for C to E for installation of new additional Boiler with proposed capital investment of 15.80 Cr. Industry is location is about 0.5 km from Patalganga river which attracts RRZ policy. Industry has not submitted distance certificate, proposal for pollution control system as asked by SRO. There is also increase in fuel quantity, water consumption and pollution load (air & Water) as reported by SRO.	
Recommendation of RO	This is for consent to establish of new 5 TPH furnace oil fired boiler. The industry having 3 TPH furnace oil fired boiler but they require higher capacity steam boiler. The location of industry does not fulfill the RRZ policy therefore expansion cannot be permitted. Though there is no increase in production quantity, it increases the blow down and water softener plant rejects effluent as compare to 3 TPH Boiler. There will be also increase in fuel consumption for 5 TPH boiler than 3 TPH boiler, hence installation of higher capacity boiler can't be permitted. Industry has not provided ETP and STP .The quantity of sewage	

Maharashtra Pollution Control Board

	generation is 47 CMD. During the visit of Board officials' disposal of trade effluent was observed in storm water drain. This office has issued Proposed Direction followed by hearing and interim direction for provision of ETP & STP. Vide letter dtd-29/10/2013 .In view of above consent to establish for 5 TPH Boiler and other plant & machinery with proposed investment of Rs.15.80 Cr may be refused.

Name & Address	Sunshield Chemicals Ltd, Vill-Rasal, Post- Pali Dist- Raigad.	
Consent for	Amendment for increase in H.W quantity.	
Capital Investment	40.66 Cr	
Consent Valid upto	28/02/2016.	
<u>Industry Type</u>	<u>R05 Basic Chemicals & electro chemicals & its derivatives.</u>	
<u>Industry Category</u>	<u>RED</u>	
Compliance of Water Pollution Related Conditions	YES (√)	NO ()
	Details: Primary collection tank, Primary settling tank, Activated Sludge process (ASP) Biological treatment, Bio-reactor, Secondary settling tank, tertiary treatment of activated carbon bed filter, effluent storage tank. As per the previous consent condition the treated effluent out of 16 CMD generated, 6 CMD is to be send to PRIA CETP and 10 CMD is to be recycled /reused to maximum extent and remaining is to be discharge on land for gardening/irrigation. However as reported by SRO/RO at present industry is disposing 6 CMD effluents to M/s. Hydroair Tectonics Ltd, Talegaon.	
Compliance of Air Pollution Related Conditions	YES ()	NO ()
	Details: - Multicyclone dust collector for boiler, Process scrubbers provided.	
Water Cess	Assessment Done: returns upto- Dec-2013.	Paid upto: 31-03-13
BG Details	Amount:	Validity
	BG obtained against:	
	Details of BG forfeited/ enchased, if any:	
Submission of Environmental Statement	Period	2012-13

Maharashtra Pollution Control Board

Other Relevant Information	<p>Industry has applied for amendment in existing consent with increase in H.W quantity of clay catalyst from 77 kg/day to 425 kg/day. Industry has submitted that the catalyst used was aluminum chloride & clay. The aluminum chloride after reaction is washed with water. Aluminum chloride is highly corrosive & hazardous substance .The end product antioxidant is used in industrial oil, automotive oil. The engine oil specification have become very stringent & cannot tolerate impurities like iron & other metals which are present with aluminum chlorides, hence process was developed using clay. This clay is replacing aluminum chloride for safe handling & reduction in effluent generation. The consumption of clay is rising due to rise in antioxidation & replace with aluminum chloride to meet market needs. The process is approved by MNCs worldwide for use of clay for antioxidant manufacturing. This office vide letter dtd-31/01/2014 had called details of change in process, increase in C.I, H.W returns, Material balance etc. In reply industry has submitted the details of material balance due change in technology, H.W return details etc. It is noted that due to use of clay catalyst waste water generation is reduced from 6.0 CMD to 4.5 CMD, The catalyst waste generation in existing process was 17 kg per batch i.e- 34 kg for two batches, however due to clay catalyst the proposed waste generation is 212.5 kg per batch i.e- 425 kg for two batches per day. Industry has submitted the difference fee on increase investment from last consent granted.</p>
Recommendation of SRO/RO	<p>The amendment in consent in respect of hazardous waste quantity may be granted.</p>
