MAHARASHTRA POLLUTION CONTROL BOARD

The Maharashtra Pollution Control Board has been established under Section 4 of the Water (Prevention and Control of Pollution) Act, 1974, and shall be deemed a State Board for the prevention and control of pollution under the provisions of the Air (Prevention and Control of Pollution) Act, 1981. The Board is also entrusted with the responsibility of implementing the provisions of the Environment (Protection) Act, 1986 and the rules framed thereunder.

To assist the pollution potential, the MPC Board regularly analyse water samples, air samples and hazardous waste samples in the Central Laboratory and 7 Regional Laboratories.

For creating general awareness among people about environmental issues, the board constantly strives to organize various awareness programs across the state, involving journalists, media, NGOs, artists, and students. Efforts are also being made to create awareness about celebrating almost all festivals in an eco-friendly manner.

As a part of common environmental infrastructure for environmental protection, CETP for treatment & disposal of industrial effluents, Common Facilities for treatment and disposal of hazardous waste and bio-medical waste have been established across State.

The Maharashtra Pollution Control Board has taken the initiative to conduct noise monitoring throughout Maharashtra.

Functions of the State Board

1. To formulate and implement a comprehensive program to prevent, control, or reduce the pollution of rivers and wells in the state.
2. To advise the State Government on any matter relating to preventing, controlling, or reducing water pollution.
3. To collect and disseminate information on water pollution and its prevention and control.
4. To encourage, organize, and participate in investigations and research related to water pollution problems and to preventing, controlling, or reducing water pollution.
5. To cooperate with the Central Board in organizing training for persons involved in or who will be involved in programs for preventing, controlling, or reducing water pollution, and to organize related public awareness and education programs.
6. To inspect projects and plants for treating sewage or industrial wastewater, and to review plans, specifications, or other data related to water treatment plants, projects for their purification, and all designs, detailed information, and other supporting materials related to the disposal of sewage or industrial wastewater, or any consent required under this Act.
7. To establish, revise, or develop annual effluent standards for sewage and industrial effluent, and for water quality affected by effluent (excluding interstate waters), and to classify the waters of the state.
8. To develop cost-effective and reliable methods for treating sewage and industrial wastewater, considering the specific conditions of soil, climate, and water resources in different regions, and especially the prevailing flow characteristics of water in streams and wells.
9. To develop methods for using wastewater and treated industrial wastewater in agriculture.
10. To develop an efficient method for discharging sewage and industrial wastewater onto the land in areas where, due to extremely low flow rates, the dilution of wastewater cannot occur for most of the year.
11. To determine the standards for treating sewage discharged into any particular stream, taking into account the permissible limits of pollution for the water of such a stream, and to lay down standards for the treatment of sewage and industrial wastewater.
12. To issue, modify, or cancel any order –
 - (a) Prohibiting, controlling, or reducing the discharge of water into streams or wells.

- (b) To direct any concerned person to construct a new system for the disposal of sewage and industrial effluent, or to modify, alter or extend any such existing system, or to adopt such measures as may be necessary for preventing, controlling or mitigating water pollution.
- 13. To determine the wastewater standards that individuals must adhere to when discharging sewage or sludge or both, and to determine, revise, or enforce annual wastewater standards for sewage and industrial wastewater.
- 14. To advise the state government regarding the location of any industry that is likely to pollute streams or wells.
- 15. To perform other functions prescribed or assigned from time to time by the Central Board or the State Board.
