MAHARASHTRA POLLUTION CONTROL BOARD

A summery statement on progress made by Authorities in respect of implementation of schedule –II [Rule 6 (1) & (3), 7 (1)]

Maharashtra is one of the most urbanized states of the country. The state is having total 251 Nos. of Local Bodies. Urban Development Department, Government of Maharashtra has decided that Local body shall utilized 56.5% of total granted fund in the 12th Finance Commission and from JNNURM for effective implementation of Municipal Solid Waste (Management & Handling) Rules, 2000. On that basis, most of Local Bodies have submitted project report for management of Municipal Solid Waste.

The Bio-medical waste and industrial hazardous waste generated in the area of local bodies is not mixed with MSW and such waste is disposed off separately in accordance with provisions made under BMW (Management & Handling) Rules, 1998 and Hazardous waste (Management & Handling and Trans Boundary Movement) Rules, 2008 . For the disposal of Hazardous waste, common Hazardous waste treatment & disposal facility have been developed in the State. For the disposal of the Bio-medical waste, Common Bio-medical waste treatment facilities have been provided.

1. Collection of Municipal Solid Waste:

Generally in all Municipal area littering of MSW have been prohibited. The local bodies at several places have organized collection of MSW by house to house collection, by using Ghanta gaddies, Collection bins. The waste from slaughter houses, meat & fish markets, fruit & vegetable market, which are biodegradable in nature, are disposed by composting.

2. Segregation of Municipal Solid Waste:

The segregation of MSW generally carried out by the mode of source segregation or in the transportation vehicle itself by the workers or in some cases, at waste disposal processing facility by ragpickars. The recyclable waste finds its route for recovery/recycling. The inert material, construction debris are being disposed by land filling/leveling.

3. Storage of Municipal Solid Waste:

The storage facility provided by ULBs in the form of RCC Bins, plastic bins, and containers. In some ULBs house to house collection is carried out & the collected waste is directly taken to dump site.

4. Transportation of Municipal Solid Wastes:

Transportation of waste carried by vehicles. Mostly the tarpaulin cover is put on the waste while transporting and in some cases the vehicle are closed or pneumatic compactors are used in few corporation areas.

5. Processing of Municipal Solid Wastes:

The biodegradable waste is processed by aerobic & anerobic compostings, vermicomposting, anaerobic digestion, etc. Most part of the non-biodegradable and recyclables are removed by informal sector/the rag picker in the bins or on the dump sites which is further sold to recyclers.

6. Disposal of Municipal Solid Wastes:

Selectable landfill facilities have been provided by very few ULBs. However others are in the process of setting up of such facilities.

MAHARASHTRA POLLUTION CONTROL BOARD

Summary statement on progress made by Municipal Authorities in respect of implementation of schedule-III [Rules 6(1) & (3), 7(2)]

The main constraint for the effective implementation of MSW Rules & setting up of waste processing facility for local bodies is non-availability of suitable land. Considering the constraint, the Urban Development Dept, Govt of Maharashtra has passed order regarding formation of District level committee in every District under the Chairmanship of District Collector. The main object of district level committee is to identify & select waste processing and landfill sites. The Committee comprises of 11 members of various concerned department. The District level committee while identifying the suitable location for landfill and waste processing site, a care is taken that the site should be away from habitation clusters, forest, water bodies, monuments, wet lands and places of important cultural, historical and religious aspect including CRZ areas. Board has issued MPCB letter no. WP/B-4746 dt. 05.08.2003, indicating distance criteria for selecting such sites. Board has issued letter to all concerned Regional Officer's to follow up this criteria while selecting/recommending the sites. The major difficulties in identifications of these sites are coastal regulation zone, state river regulation zone policy, nearness to water bodies, non-availability of land, resistance of local people, etc.

MAHARASHTRA POLLUTION CONTROL BOARD

Guidelines issued by MPCB for identification of processing and landfill site

Checklist (1 to 6)

1. Location Plan, Site Plan, Distance from habitation, river, water bodies.
2. Permission/views express by the District Collector about proposed site from Town planning Authority, GSDA, Airport Authority (In case applicable).
3. Distance from water bodies/Forest land/national Park/Wet land/Historical places/Habitation/Monuments etc.
4. Quantum of Generation of organic and inorganic MSW.
5. Technology details/Project details:
 - I. Environment related information as required under the rules.
 - II. Proposed Methodology of waste processing.
6. S.R.O./R.O. to give NOC/Site Clearance letter to Municipal Council/ Corporation for setting up MSW facilities based on the decision taken by Committee appointed by District Collector for the District.

Site Selection Criteria (7 to 9)

7. No Development Zone distance to be kept 500 mtrs. from the boundary of the landfill site.
8. Capacity of site should be preferably for 20-25 years.
9. The distance from human habitation of the site should be about 500 mtrs.

Site Selection Criteria for landfill and processing site for MSW

(10 to 16)

10. The distance from river (HFL) will be as per RRZ policy.
11. Distance from other Water bodies (other than notified rivers) beyond 500 mtrs avoiding up stream catchments areas of the water bodies, location should preferably at the down stream of the water body.
12. The distance from National monuments and historic places etc. as mentioned in the rules, duly certified by Archeological Department should be beyond 500 mtrs.
13. A buffer zone- It should be 500 mtrs from the periphery of new landfill site.
14. The distance from National and state highway should be more than 200 mtrs.
15. In respect of CRZ, RRZ rules will be followed strictly.
16. Old queries and low lying areas within a city may be earmarked for filling only with construction waste, debris, road dust, silt from open drains and similar non-toxic inert material only.

MAHARASHTRA POLLUTION CONTROL BOARD

***A SUMMARY STATEMENT ON PROGRESS MADE BY MUNICIPAL AUTHORITIES
IN RESPECT OF IMPLEMENTATION OF SCHEDULE- IV [RULES 6(1) & 3, 7 (2)]***

Out of 251 ULBs in the State of Maharashtra, most of the local bodies have adopted composting methodologies to part of waste & rest goes for dumping. Nashik, Mira Bhayander, Nagpur, Jalgaon, Vasai-Virar and Pune Municipal corporations are treating waste for overall generated capacity.

MAHARASHTRA POLLUTION CONTROL BOARD

Initiative taken/proposed by the MPC Board:

- To speed up the process of grant of Authorization, MPC Board has delegated the power to respective Regional Officer's for grant of Authorization in respect of 'B' & 'C' class ULBs.
- For effective implementation and compliance of these Rules, Board pursues the matter with Principal Secretary Urban Development Department, Mumbai requesting to personally look into the matter for compliance.
- The Board has extended financial assistance to five local bodies for setting up model/demo MSW projects viz.
 1. Ambad Municipal Council
 2. Murud-Janjira Municipal Council
 3. Navapur Municipal Council
 4. Sonpeth Municipal Council
 5. Baramati Municipal Council

The Sonpeth Municipal Council, Ambad Municipal Council, Navapur Municipal Council & Murud-Janjira Municipal Council are working satisfactory, they are producing compost from the project.

In addition to this Board has decided to extend financial & technical assistance to Jalna, Mun. Council for MSW management and also board has released financial grant to the Latur Mun. Council under 'Latur Environment Action Plan' for the establishment of secured landfill (SLF) facility & for one lakh tree plantation in the city for environment improvement.

- The Board has conducted workshop with ULBs to create awareness of MSW management. Also took part, supported financially to arrange workshop/seminars in this field & made presentations.
- Continuous and strict follow up taken by MPCB has resulted in establishment of such large number of Municipal Solid Waste facilities may be the part of the Municipal Solid waste. This will be further extended to their complete municipal waste generated.
- Board decision made for financial assistance under 'Environment Improvement of religious places' to the religious places for installation of MSW plant scientifically treatment and facility, i.e. Shegaon, Shani-Shingnapur, Dehu, Alandi, Shirdi, Pandharpur.
- Board constantly pursue with the Local Bodies and has issued notices to local bodies for proper management of Municipal Solid Waste.

Constraints/difficulties in Implementation:

- Inadequate finance and further managements system by Local Bodies
- Inadequate trained staff with local bodies
- Lack of management skill with Local Bodies
- Relegation of waste disposal priority at local Bodies.
- Multiplicity of agencies for waste management by Local Bodies.
- Non availability of suitable land for handing over to concerned local bodies that are not having their own land.
- Provision in the rules for siting criteria (Schedule-II).
- Not in my back yard tendency.
- Community resistance.
- Negligible attitude of local bodies.
- The local bodies in coastal area are facing the difficulties in identification of suitable land due to CRZ notifications.
- The location policy of State Government in respect of notified Rivers (RRZ Policy) doesn't allow for sitting of such type of activity
- Selection of proper waste processing technology with respect to waste generation including waste to energy plants.
- Lack of public awareness/participation.
- Lack of manpower with MPC Board for proper and effective implementation & monitoring of MSW (M&H) Rules, 2000.

Suggestions:

- Form expert group to select technology suitable to different group of ULB's.
- Form expert group to redefine to site selection criteria considering advance technology and need for decentralize treatment plant.
- To decide policy on creating regional landfill sites, also to enforce fine against the defaulting stakeholders.
- Ensuring speedy implementation of MSW Rules.
- No grant shall be released to the ULB's if no provision in the plan for MSW management and no progress.
- May think of one creating authority like MJP (Maharashtra Jeevan Pradhikaran) for selecting, providing and operating TSDF by itself or on BOOT basis.
- Speedy identification and handing over landfill and waste processing sites by State Government to concerned local bodies particularly in the coastal region.
- Low cost standard models shall be made available for 'B' & 'C' class Councils.
- Provision of adequate funds to ULB & MPCB for effective implementation of MSW Rules, 2000.
- Requisition of additional manpower to MPCB for environmental monitoring in respect of AAQM & ground water monitoring in the vicinity of waste processing sites.
- Notifying new MSW Rules
